Brainstorm & Idea Prioritization

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Team Members

- **Nagur Basha Shaik** – Team Lead
- **Yamuna Mellempudi** – Frontend Developer
- **Vangapandu Pavani** – UI/UX Designer
- **Pilaka Phani Surya Bhavani Sankar Reddy** – Backend Developer
- **Pothina Chandrika Rani** – Database & Testing

Selected Problem Statement

Many devotees face long waiting queues, overcrowding, and inconvenience while booking temple darshan tickets through traditional offline methods. The manual booking process is time-consuming and lacks transparency in slot availability. Temple administrators also find it difficult to manage large crowds, bookings, and visitor records efficiently.

Objective

Develop a secure, scalable, and user-friendly online platform that enables devotees to book darshan tickets conveniently while assisting temple administrators in managing bookings, temples, and darshan slots effectively.

Step-2: Brainstorm, Idea Listing and Grouping

Brainstormed Ideas

Idea No.	Brainstormed Idea	Category
I-1	Online Darshan Ticket Booking	Core Feature
I-2	User Registration and Login	Authentication
I-3	Real-Time Slot Availability	Booking
I-4	Temple Search and Details	User Experience
I-5	Booking History	User Management
I-6	Admin Dashboard	Administration
I-7	Temple Management	Administration
I-8	Darshan Slot Management	Administration
I-9	QR Code Ticket Verification	Future Enhancement
I-10	Online Payment Gateway	Future Enhancement
I-11	Google Maps Integration	Navigation
I-12	AI-Based Crowd Prediction	Future Enhancement
I-13	Multilingual Support	Accessibility
I-14	Email/SMS Booking Notifications	Communication
I-15	Mobile Responsive Design	User Experience

Idea Grouping

Group 1 – User Features

- User Registration
- User Login
- Temple Search
- Temple Details
- Darshan Slot Booking
- Booking History
- Responsive Interface

Group 2 – Admin Features

- Admin Login

- Temple Management
- Booking Management
- Slot Management
- Dashboard Analytics

Group 3 – Future Features

- Online Payments
- QR Code Verification
- Google Maps
- AI Crowd Prediction
- Multilingual Support
- SMS Notifications

Step-3: Idea Prioritization

Idea	Business Value	Technical Feasibility	Priority	Release
User Registration	High	High	High	Version 1.0
User Login	High	High	High	Version 1.0
Temple Listing	High	High	High	Version 1.0
Temple Details	High	High	High	Version 1.0
Darshan Slot Booking	Very High	High	Very High	Version 1.0
Booking History	High	High	High	Version 1.0
Admin Dashboard	High	High	High	Version 1.0
Temple Management	High	High	High	Version 1.0
Slot Management	High	High	High	Version 1.0
Responsive UI	High	High	High	Version 1.0
QR Code Verification	Medium	Medium	Medium	Version 2.0

Online Payment	Very High	Medium	Medium	Version 2.0
Google Maps	Medium	High	Medium	Version 2.0
Email Notifications	Medium	High	Medium	Version 2.0
AI Crowd Prediction	High	Low	Low	Version 3.0
Multilingual Support	Medium	High	Medium	Version 2.0

Final Selected Solution

AI Crowd Prediction	High	Low	Low	Version 3.0
Multilingual Support	Medium	High	Medium	Version 2.0

Final Selected Solution

After evaluating the ideas based on customer value, implementation effort, and technical feasibility, the team selected the following features for the first release of DarshanEase:

Secure User Registration and Login

Temple Search and Details

Real-Time Darshan Slot Availability

Online Darshan Ticket Booking

Booking History

Administrator Dashboard

Temple and Slot Management

JWT-Based Authentication

Responsive MERN Web Application

Conclusion

The brainstorming session enabled the team to generate multiple innovative ideas, classify them based on functionality, and prioritize them according to business value and technical feasibility. This structured approach helped identify the essential features for the initial release while establishing a roadmap for future enhancements of the DarshanEase – Temple Darshan Ticket Booking System.

After evaluating the ideas based on customer value, implementation effort, and technical feasibility, the team selected the following features for the first release of **DarshanEase**:

- Secure User Registration and Login
- Temple Search and Details
- Real-Time Darshan Slot Availability
- Online Darshan Ticket Booking
- Booking History

- Administrator Dashboard
- Temple and Slot Management
- JWT-Based Authentication
- Responsive MERN Web Application

Future versions will include online payment integration, QR code verification, Google Maps support, multilingual interfaces, AI-based crowd prediction, and notification services.

Conclusion

The brainstorming session enabled the team to generate multiple innovative ideas, classify them based on functionality, and prioritize them according to business value and technical feasibility. This structured approach helped identify the essential features for the initial release while establishing a roadmap for future enhancements of the **DarshanEase – Temple Darshan Ticket Booking System**.
