Proposed Solution Template

S. N	Parameter	Description
1	Problem Statement	Devotees often experience long waiting times, overcrowding, and inconvenience while booking temple darshan tickets through traditional offline methods. Manual booking systems can lead to inefficiencies, lack of transparency in slot availability, and difficulty in managing visitor flow. There
2	Idea / Solution Description	DarshanEase is a MERN Stack-based web application that enables devotees to book temple darshan tickets online from anywhere. The system allows users to register, log in securely, browse temples, view available darshan slots, book tickets, and manage bookings. An administrator dashboard enables efficient
3	Novelty / Uniqueness	The proposed solution provides a centralized digital platform for temple darshan management with real-time slot availability, secure JWT-based authentication, responsive web design, and an intuitive booking interface. Its modular MERN architecture supports future enhancements such as online
4	Social Impact / Custodian	The application enhances the spiritual experience by reducing waiting times, minimizing overcrowding, and providing a convenient online booking process. Devotees can plan their visits in advance, ensuring a smooth and organized darshan experience. Temple authorities benefit from improved crowd
5	Business Model (Revenue)	The application can generate revenue through premium booking services, convenience fees for online bookings, integration with payment gateways, temple donations, advertising religious events, premium membership plans, and partnerships with travel and tourism service providers.
6	Scalability of the Solution	The application is built using the scalable MERN Stack architecture with React.js, Node.js, Express.js, and MongoDB. It supports cloud deployment using Vercel, Render, and MongoDB Atlas, enabling easy scaling to accommodate increasing numbers of users, temples, and bookings. The modular

Conclusion

The **DarshanEase – Temple Darshan Ticket Booking System** offers a modern, secure, and scalable solution for managing temple darshan bookings. By digitizing the booking process, it improves user convenience, enhances temple administration, and provides a strong foundation for future technological advancements.
