Level-0 Data Flow Diagram (Context Diagram)

Level-1 Data Flow Diagram

User Stories

The following user stories describe the major functionalities of the DarshanEase application.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Web User)	Registration	-USN 1	As a user, I can register using my personal details.	User account is successfully created.	High	Sprint-1
Customer (Web User)	Login	-USN 2	As a user, I can log in using my email and password.	User is redirected to the dashboard after successful login.	High	Sprint-1

Customer (Web User)	View Temples	-USN 3	As a user, I can browse the list of available temples.	Temple information is displayed successfully.	High	Sprint-1
Customer (Web User)	Search Temples	-USN 4	As a user, I can search temples by name or location.	Matching temples are displayed.	Medium	Sprint-2
Customer (Web User)	View Temple Details	-USN 5	As a user, I can view detailed information about a selected temple.	Temple description, timings, and slots are displayed.	High	Sprint-1
Customer (Web User)	View Darshan Slots	-USN 6	As a user, I can view available darshan slots.	Available slots are displayed correctly.	High	Sprint-1
Customer (Web User)	Book Ticket	-USN 7	As a user, I can book a darshan ticket by selecting a slot.	Booking is confirmed and booking ID is generated.	High	Sprint-1
Customer (Web User)	Booking History	-USN 8	As a user, I can view all my previous bookings.	Booking history is displayed correctly.	High	Sprint-2
Customer (Web User)	Cancel Booking	-USN 9	As a user, I can cancel an existing booking.	Booking status changes to cancelled.	Medium	Sprint-2
Customer (Web User)	Profile Management	-USN 10	As a user, I can update my profile information.	Updated profile is saved successfully.	Medium	Sprint-2
Administrator	Admin Login	-USN 11	As an administrator, I can securely log in to the admin panel.	Admin dashboard opens successfully.	High	Sprint-1
Administrator	Temple Management	-USN 12	As an administrator, I can add new temples.	Temple is successfully added to the database.	High	Sprint-2
Administrator	Temple Management	-USN 13	As an administrator, I can update temple details.	Temple information is updated successfully.	High	Sprint-2
Administrator	Temple Management	-USN 14	As an administrator, I can delete temples.	Selected temple is removed from the system.	Medium	Sprint-2
Administrator	Slot Management	-USN 15	As an administrator, I can create darshan slots.	New slot is available for booking.	High	Sprint-2
Administrator	Slot Management	-USN 16	As an administrator, I can update darshan slot timings.	Updated slot information is displayed correctly.	Medium	Sprint-2
Administrator	Booking Management	-USN 17	As an administrator, I can view all bookings.	Complete booking list is displayed.	High	Sprint-2

Administrator	User Management	-USN 18	As an administrator, I can manage registered users.	User information is displayed and managed successfully.	Medium	Sprint-3
Administrator	Dashboard	-USN 19	As an administrator, I can view booking and user statistics.	Dashboard displays accurate reports and statistics.	Medium	Sprint-3

Summary

The Data Flow Diagram illustrates how information moves between users, the application, and the MongoDB database. The user stories define the core functionalities required by devotees and administrators, ensuring that the DarshanEase system meets both business and user requirements through an agile, sprint-based development approach.
