

Entity Relationship (ER) Diagram

Entities

1. User

Attributes

- User_ID (Primary Key)
- Full_Name
- Email
- Phone_Number
- Password
- Address
- Created_At

2. Temple

Attributes

- Temple_ID (Primary Key)
- Temple_Name
- Location
- Description
- Opening_Time
- Closing_Time

3. Darshan Slot

Attributes

- Slot_ID (Primary Key)
- Temple_ID (Foreign Key)
- Date
- Start_Time

- End_Time
- Available_Seats
- Status

4. Booking

Attributes

- Booking_ID (Primary Key)
- User_ID (Foreign Key)
- Slot_ID (Foreign Key)
- Booking_Date
- Number_of_Persons
- Booking_Status
- QR_Code (Optional)

5. Admin

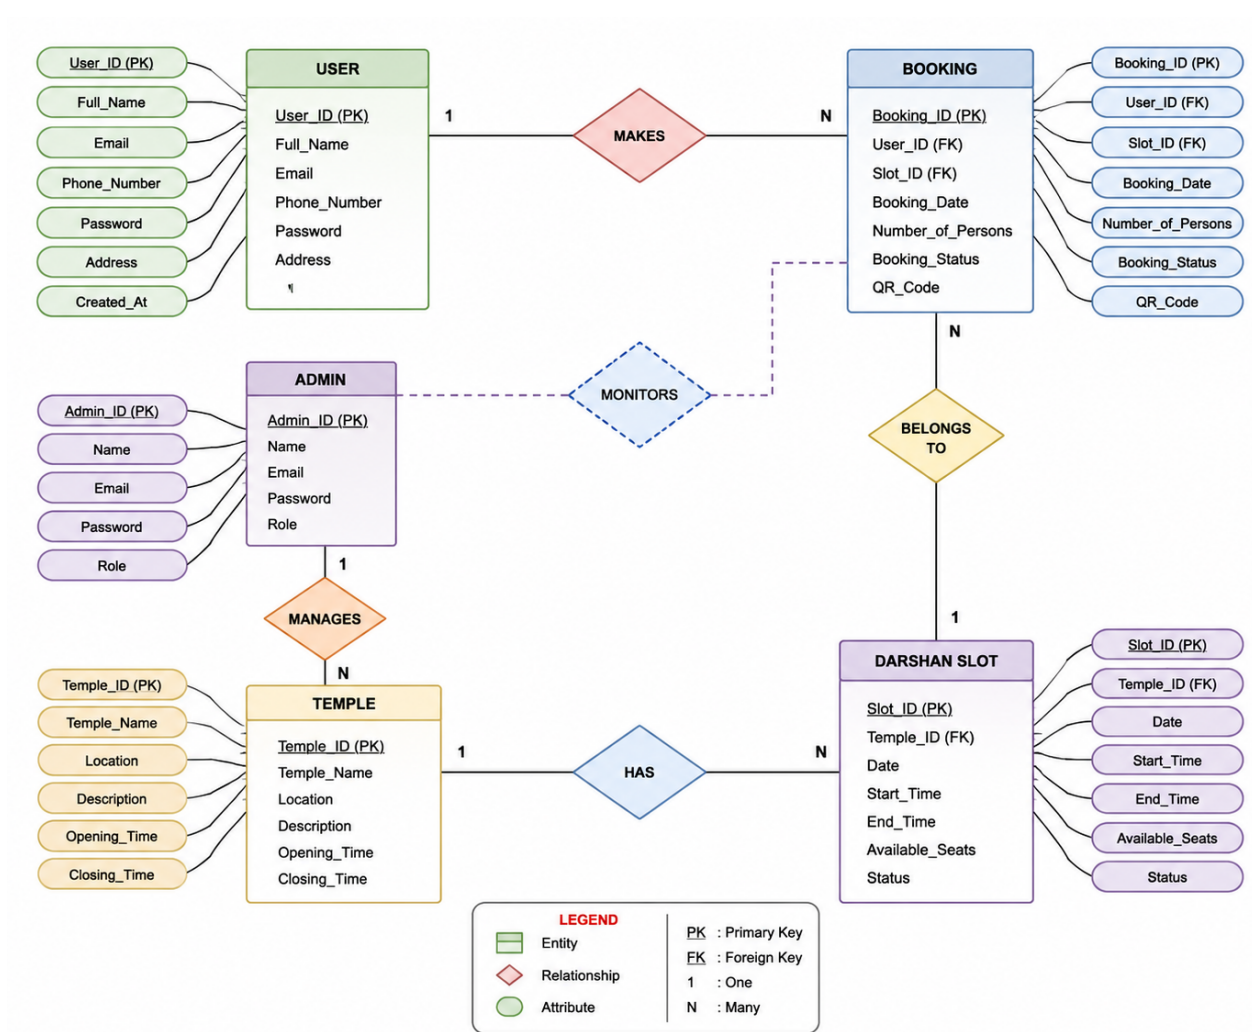

Attributes

- Admin_ID (Primary Key)
- Name
- Email
- Password
- Role

Relationships

- One **User** can make **many Bookings**.
- One **Temple** can have **many Darshan Slots**.
- One **Darshan Slot** can have **many Bookings**.
- One **Admin** manages **many Temples** and **many Bookings**.

ER Diagram:-

Relationship Cardinality

- **Admin (1) → (N) Temple**
- **Temple (1) → (N) Darshan Slot**
- **Darshan Slot (1) → (N) Booking**
- **User (1) → (N) Booking**

This ER model ensures that each booking belongs to one user and one darshan slot, while each temple can offer multiple darshan slots. Administrators manage temple information and oversee all bookings.
