

User Flow

Overview

The User Flow illustrates the sequence of actions performed by a devotee while using the DarshanEase application. It shows how users interact with the system, from registration to booking and managing darshan tickets.

User Flow Steps

Step 1: Open Application

- The user launches the DarshanEase website or mobile application.

Step 2: Register / Login

- New users create an account.
- Existing users log in using their email and password.

Step 3: Browse Temples

- View the list of available temples.
- Select a preferred temple.

Step 4: View Temple Details

- View temple information.
- Check available darshan dates and time slots.

Step 5: Select Darshan Slot

- Choose the preferred date and time slot.
- Enter the number of devotees (if applicable).

Step 6: Book Ticket

- Confirm the booking details.
- The system validates slot availability.
- (Optional) Complete online payment if payment integration is enabled.

Step 7: Booking Confirmation

- The system generates a booking confirmation.
- A Booking ID and QR Code (optional) are generated.
- Confirmation is displayed to the user.

Step 8: View Booking History

- Users can access all previous and upcoming bookings.
- View booking details and status.

Step 9: Cancel Booking (Optional)

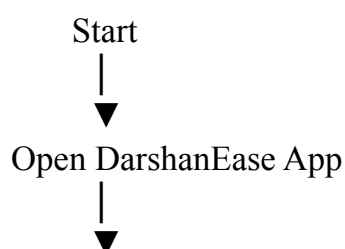

- Users may cancel a booking before the permitted deadline.
- The system updates slot availability automatically.

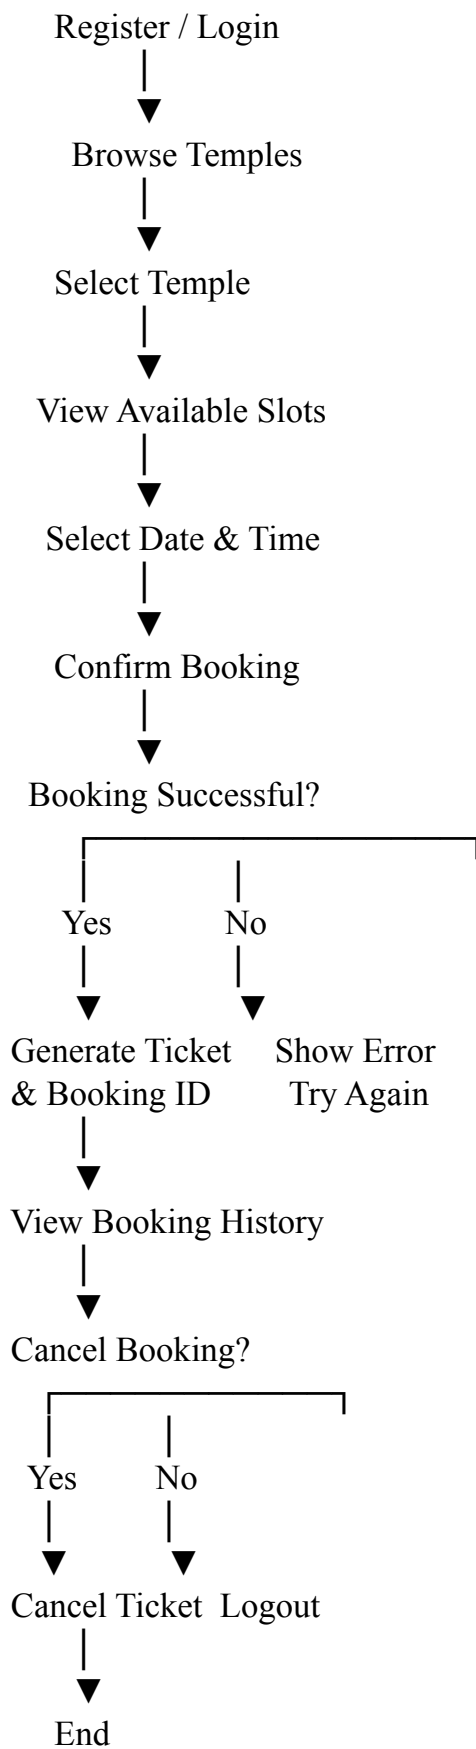

Step 10: Logout

- Users securely log out of the application.

User Flow Diagram

Summary

The user flow ensures a smooth and intuitive booking experience by guiding devotees through registration, temple selection, slot booking, confirmation, and booking management. The streamlined process minimizes waiting time, improves usability, and supports efficient crowd management at temples.
