

Roles and Responsibilities

The DarshanEase system defines different user roles to ensure secure access, efficient management, and smooth operation of the temple darshan ticket booking process. Each role has specific responsibilities and permissions.

1. User (Devotee)

Responsibilities

- Register and create an account.
- Log in securely using valid credentials.
- Browse available temples and darshan schedules.
- View available dates and time slots.
- Book darshan tickets online.
- View booking history and ticket details.
- Cancel bookings within the allowed time (if applicable).
- Download or print booking confirmations.
- Update personal profile information.

Permissions

- Access personal dashboard.
- Book and manage personal tickets.
- View only their own booking records.
- Update personal account details.

2. Administrator (Admin)

Responsibilities

- Manage temple information.
- Add, edit, and delete temple records.
- Create and manage darshan time slots.
- Monitor ticket availability.

- View and manage all user bookings.
- Handle booking cancellations and modifications.
- Manage registered user accounts.
- Generate booking reports and statistics.
- Ensure smooth operation of the booking system.
- Maintain data accuracy and system security.

Permissions

- Full access to the admin dashboard.
- Manage all temples, slots, users, and bookings.
- Generate administrative reports.
- Configure system settings.

3. System

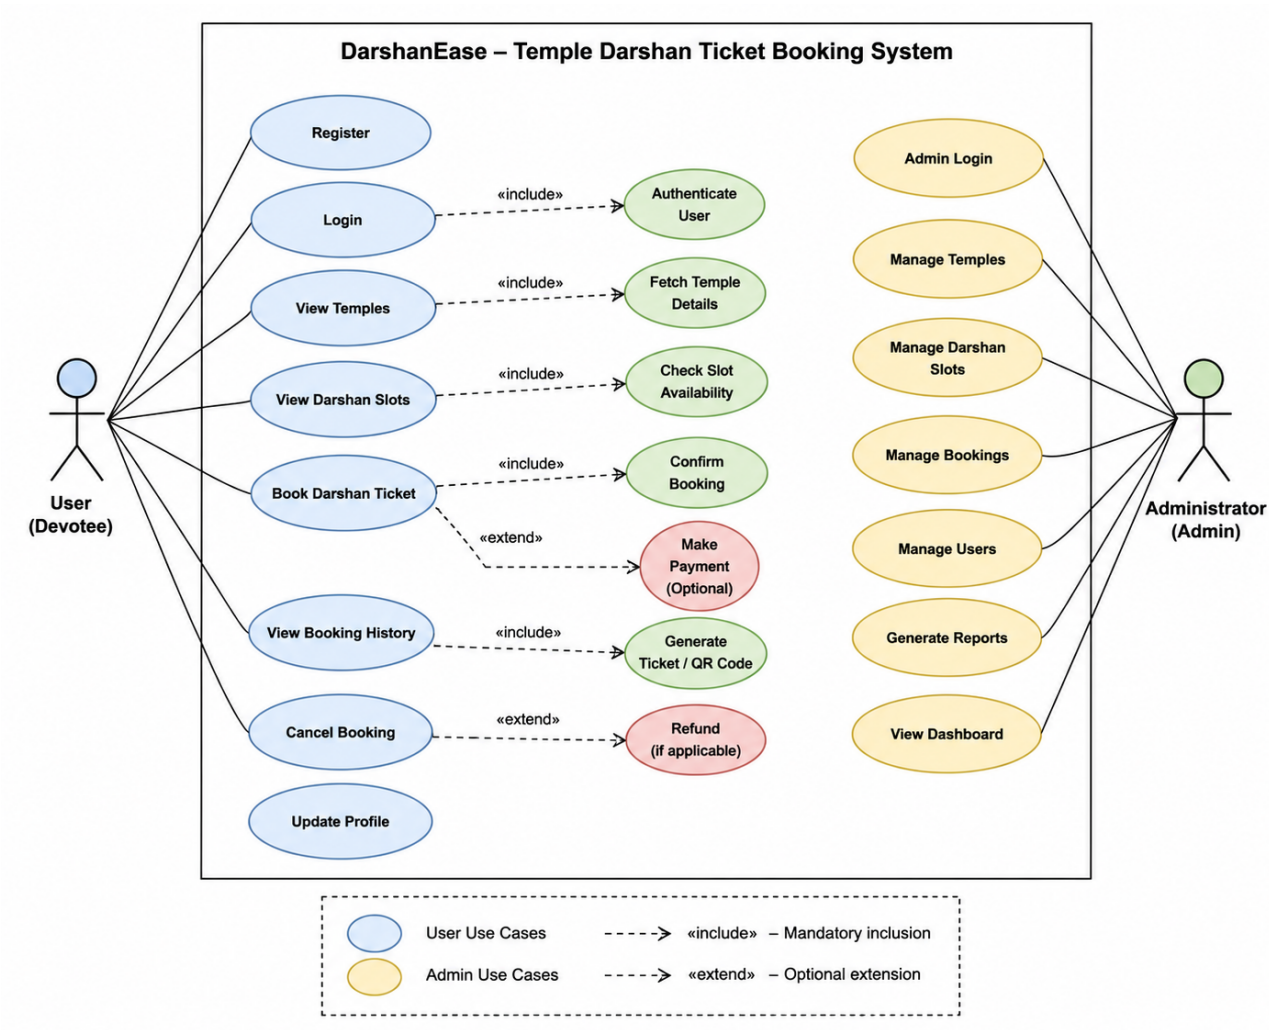

Responsibilities

- Authenticate users and administrators.
- Validate booking requests.
- Check real-time slot availability.
- Prevent duplicate or overbooked reservations.
- Store and retrieve data securely.
- Generate booking confirmations.
- Maintain booking history.
- Handle errors and exceptions.
- Protect sensitive user information through secure authentication and data storage.

Permissions

- Execute business logic.
- Access the database.
- Process API requests.

- Perform automated validation and notification tasks.

Role Interaction Summary

Role	Key Responsibilities
User (Devotee)	Register, log in, browse temples, book darshan tickets, view/cancel bookings, manage profile
Administ	Manage temples, darshan slots, bookings, users, reports, and overall system operations
System	Authenticate users, validate bookings, manage database operations, enforce security, and generate booking confirmations

Conclusion

The role-based structure of DarshanEase ensures that each participant has appropriate access and responsibilities. Users can easily book and manage darshan tickets, administrators efficiently oversee temple operations and bookings, and the system securely handles authentication, booking validation, and data management. This separation of responsibilities enhances security, improves operational efficiency, and provides a seamless experience for both devotees and temple administrators.
